VIEWS OF THE OTHER SIDE.

THE NATIONAL SOCIETY OF COLONIAL DAMES TELLS ITS STORY.

WORK OF THREE THOUSAND WOMEN AGAINST THAT OF ONE HUNDRED-NO DESIRE FOR CONTROVERSY

Members of the Society of Colonial Dames of the State of New-York, belonging to the National Society of Colonial Dames of America, feel that their side of the controversy concerning the title which is claimed by the original organization of Colonial

They acknowledge that the opposing body was e first to organize, but they claim that the idea of making the movement a National one was soon thought of by many outside of the society, and also by Mrs. Martha Lamb, a member of the first society, which, they declare, was not willing to kent the tone of the meetings almost social.

In speaking on the subject to a Tribune reporter sterday one of the officers of the Colonial Dames of the State of New-York said that discontent was early felt in the original society because of its exclusive policy, and that the idea of forming a Na-

They did not propose to have chapters, but society in each of the thirteen original States and one in the District of Columbia, with the meeting place of the congress at Washington. that It is strange that the original society should have raised any controversy about the movement or the name so long after the thing was an

ment or the name so long after the thing was an accomplished fact. It has let the matter remain undisputed for six years, and though making occasional criticisms has even gone the length of accepting an invitation to a breakfast given by the National society.

"The disturbance came to a head last summer," said the officer to the reporter, "when we were busy with our war relief work. You know we were the first society to organize for relief work and a great hindrance was put in our way when the original Dames served an injunction on us, prohibiting our use of the name. There was our work going on, we needed money, and we were unable to sign checks or get funds.

"About one hundred women were stopping the efforts that three thousand were making to give

or get funds.

"About one hundred women were stopping the efforts that three thousand were making to give the sick soldiers some of the things they needed. However, the Dames relented, and the injunction being raised we continue our work.

"We are still carrying on this work and have an active form of it at Manila. But now we do not know what the original society means to do. We hear it is to take action somehow, but when or how we are ignorant."

The speaker further narrated some of the efforts made to unite the two societies. She said many things were acceded to the original Dames, one being in regard to officers, but when they asked to have their president retained and the other dropped that was found unfeasible. They also wished to keep their society pin. This was allowed if the pins were worn only at State meetings:

"It would seem," continued this officer, "that the social side of the meetings is the one most favored by the original Dames, but we want to work to accomplish something. We have a committee which has been investigating for some years the merits of essays on Colonial history and awarding the prize we offer for the best. Formerly we gave this prize to the Normal College but this year we have given one to Teachers' College and one to the Training School for Teachers at Henry and Oliver sis. "We are also offering a similar prize in the city of Rochester in recognition of the splendid war relief work done there last summer. Another work of ours is the supporting of a teacher for the City History Club. Then there is the Van Cortlandt Manor, which we took from the State and support as a Colonial museum. You know it is open to the public every day except Thursday. The associate societies in twenty-three non-Colonial States carry on the same system of work, and are equally interested in the question now pending between the two organizations."

IAN MACLAREN'S LAST READING.

Dr. Watson said he was glad to read for so worthy a cause—one that meant the restoration to health of those who would come back from their summer outing uplifted and braced for the work of the world which is their portion.

He read from "The Bonnie Brier Bush" and "Auld Lang Syne." He chose the passages de-

The Scotch inclination to honor learning was especially commented on, the assertion being made that no more honored title is known to the Scot than that of professor. "It is charged," said Dr. Watson, "with philosophy, theology, erudition of all kinds, and it is something to even see the back of the man who can be called a professor."

Alluding to the Scotch reserve of character. Dr. Watson said: "If we make a mystery about what might as well be told, never mind; think charitably of us. We keep the vell before the holy of holles and sometimes stand before it with a drawn sword, for it is the nature of us."

The commencement of the New-York Post-Gradschool, Second-ave, and Twentieth-st., to-morrow at 8:30. Professor Bache Emmet and the Rev. Dr. Marvin R. Vincent will make addresses. Next year, when the Home for the Nurses, given to the school by H. C. Fahnestock, is completed, the school will be known as the Margaret Fahne-stock Training School for Nurses.

NOT TO FORGET THE RED MEN.

Association, a timely address was made by Mrs. Richard Hartley, who spoke of the responsibility of the American people at the present crisis, and said that in undertaking to relieve the wrongs of other countries this nation should not forget to do justice to the red men, who originally owned the land. An appeal was also made by Mrs. Mary Lowe Dickinson, for the interest of the Association in the approaching Peace Conference.

He made his appearance with pleasing promptness, so that as members and vis-

Appetizing cakes and confections in pretty dishes were set out on beautiful doilles that the club is so proad to count among its possessions. Some of them are the work of actresses who are so known to histrionic fame that no one would suspect them of executing such peculiarly feminine work.
